ultraframe

# victorian

The Victorian is the most popular style of conservatory, with a versatility that makes it suitable for many house styles. Its distinguishing architectural feature is a bay front, giving a curved shape. A steeply pitched roof and ornate ridge details can give this style of conservatory a more classical appearance.

The Victorian style is available in:

- three facet – a bay front that has three main windows which give a curved appearance, widely angled for maximum space.
- five facet – a bay front with five main windows creating a more rounded appearance.

The Ultraframe Victorian style is available in a choice of two systems:

**Classic** and **Uzone**

# georgian

The Georgian is a flat-fronted style that offers excellent use of floor space due to the square or rectangular internal shape.

Each side of the roof slopes back to the centre and the resulting contemporary style is suited to the majority of properties.

The Ultraframe Georgian style is available in the **Classic** system, for a more traditional look, or the **Uzone** system for a property requiring a more contemporary style.

# gable

A gable-fronted style of conservatory adds a sense of grandeur to any home.

With the same angular floor space as a Georgian, a gable offers excellent use of internal space. The front panel of the roof remains upright rather than sloping back to the centre as on a Georgian, creating a feeling of great height within the conservatory.

The Ultraframe gable-fronted style of conservatory is available in the **Classic** system

# lean-to

The lean-to style is for those who prefer the clean understated lines of a Mediterranean sunroom.

Traditional or contemporary, this style is ideal for properties with limited space under the eaves or an awkward area in which to fit a conservatory. However, the pitch of the roof is variable, so that a shallow pitch could fit under a low bungalow eaves, whilst a steeper pitch would match the roof of a terraced or detached house.

The Ultraframe lean-to style is available in the **Classic**, **Uzone Elevation** and **Uzone Elevation Plus** systems from Ultraframe.

# combination

The ideal style for a larger conservatory, a P-shape can combine for example a lean-to and a Victorian, to create a versatile style that can be used as two different living areas. Due to the proportions needed to achieve the P-shape, this style is better suited to larger properties, giving an impressive result.

The larger shape is perfect as a room with a dual purpose such as a lounge/dining area through to a fun family room.

The P-shape style can be specified as either a three facet or five facet Victorian or Georgian design. It is available in the Ultraframe Classic system.

The T-shape style is also better suited to larger properties due to the proportions needed. It's a combination style that is distinguished by a central projection that can be either a Victorian, Gable or Georgian.

A T-shape offers a large and versatile floor space and is an impressive addition to any home.

This style is available in the Classic system.

# something different

For those wanting a modern take on an atrium roof, the Ultraframe Orangery is the perfect option to bring light and an immense feeling of space into an adjacent room. In fact, with an Orangery, you are blurring the margins between home and glazed extension.

You are already on the way to making a life changing decision by choosing a conservatory. Space - usable for a variety of activities - and natural light a plenty, to banish those winter blues!

Do you stick to conventional conservatory colours/finishes or do you choose something different? Carefully chosen colours creates a space that works best for you and your home.

Ask to see our dedicated 'Conservatories in Colour' consumer brochure to get the full story.

# integrated shading

Only conservatories that feature Ultraframe's Classic Plus roof can benefit from an integrated shading solution.

When you ask your retailer to fit the Classic Plus roof you can enjoy the benefits of 'Shades'.

The benefits are:-

Creation of soft dappled light and shade.

Ability to create a new contemporary feel or match to your existing furnishings and décor.

Reduction in summer overheating potential – your conservatory is usable more often.

The intelligent fabrics act to create - in effect - 'triple glazing' – warmer in winter.

Controllable crossflow ventilation - fresher atmosphere and the virtual elimination of condensation.

Choose your Shades for the whole roof, one slope only or even just one panel – you're in control.

Shades can be 'demounted' when you want or to clean - alternatively choose a 'split slider' to give you even more control.

Ask to see our Shades retail brochure and swatch book...  
...35 fabrics and woodweaves to choose from.

# classic plus

If an integrated shading solution is on your shopping list - now or some time in the future - you need to ask your retailer for the Classic Plus roof option.

Externally and structurally, Classic Plus is equal to the standard Classic roof.

Internally, a new range of deeper internal claddings add a whole new dimension to the aesthetics. Mimicking timber conservatories, the 'T' shape undercladdings on the glazing bars look elegant yet strong.

At the ridge, a deeper chambered undercladding helps with thermal performance whilst a new closer fitting internal radius end completes the picture.

Overall, stunning

Classic Plus - perfect when you want integrated shading.

# personalise your conservatory

There are a variety of options to customise the exterior and interior of your conservatory. Here we explore the ways you can add your own, unique finishing touches.

## Cresting and finial options (Classic)

- Pikestaff finial, Renaissance cresting
- Classic finial, Baroque cresting
- Classic finial, Classic cresting
- Coronet finial, Tudor cresting
- Sceptre finial, Elizabethan cresting
- Low profile finial and cresting

## Optional top cappings (Classic)

## Polycarbonate options

## Dentil moulding

## Cornice

### Crestings and finials

Crestings and finials are the decorative fittings that run along the top of your conservatory roof.

A choice of crestings and finials are available with Ultraframe conservatory roofs, dependent on which system you choose. Ranging from the ultra-modern Pikestaff finial and Renaissance cresting to the more traditional Classic and Baroque combination, there are crestings and finials to suit all tastes.

### Top cappings

The bars that run between the panels in the roof of your conservatory are covered with protective top cappings, which aid the thermal efficiency of the roof. Ultraframe's Classic roof offers a choice of designs for these top cappings to give either a streamlined contemporary appearance or a more rounded traditional look.

### Dentil mouldings

A decorative cladding that can be added underneath the guttering on your conservatory for an extra touch of flair.

### Cornice

Cornice is the latest in a long line of new products from Ultraframe. Along with other innovations to the Classic roof, our purpose is to offer alternative or upgraded aesthetics to the standard roof. For those seeking the ultimate in upgrade opportunities, the Cornice is it.

### Glazing options

Another important decision to make when designing your conservatory is the choice of glazing material for the roof – glass or polycarbonate?

#### Glass

If you're specifically wanting to bring a lot more light into your home, then a glass roof is the right choice for you. Ultraframe exclusively supply Conservaglass which is specially engineered for the needs of a conservatory roof. Conservaglass works by deflecting heat from the sun in Summer to keep the inside of the conservatory cool and by retaining the warmth from heating appliances in the Winter. It also features a true self clean coating that uses the power of the sun to break down organic deposits and then uses rain water to wash it clean away.

A conservatory featuring Conservaglass either in Subtle Blue or Neutral Clear is the optimum glazing for your conservatory.

#### Polycarbonate

Polycarbonate is a lower cost alternative to glass but still provides excellent thermal properties and aesthetics. Polycarbonate is available in a range of colours, thicknesses and specifications:

- Clear
- Opal
- Bronze
- Bronze/opal
- Solar control

Ultraselect decorative strip

### Ultraselect (Classic)

Ultraselect is a range of decorative strips that style the inside of your conservatory. Unique to Ultraframe, 10 designs are available and the strips simply click into place enabling you to change the design as you wish. Choose from a range of traditional, contemporary or Mediterranean designs to suit the decorative theme of your new conservatory.

For those who already have an Ultraframe conservatory, Ultraselect can be retro-fitted to most Victorian style conservatories dating back as far as 1998. Check with your Installer.

### Fans

A range of decorative ceiling fans is available to enhance your Ultraframe conservatory and provide additional ventilation during the warmer months of the year. Available in a variety of designs, with or without light fittings and the choice of an optional remote control, there's sure to be a fan to suit you. Colours range from mahogany blades with brass fittings through to more contemporary fans with maple and chrome fittings.

### Tie bars

A tie bar is sometimes specified to help support the weight of a large roof or one that is fitted with glass. The position of the tie bar is dictated by engineering principles, and so they must be fitted. Ultraframe, however has developed a range of structural components to remove the necessity of tie bars in most projects. Please speak to your nearest installer to find out more about this option.

Fan

### Flooring

Consider your choice of floor covering carefully. If you plan to use your conservatory as a sitting room then carpet gives an inviting feel. If you have children who will be coming in from the garden, through the conservatory, then laminate flooring or tiles make a practical and contemporary alternative.

### Heating

Heating needs to be considered early in the planning stage, especially if your conservatory will be North facing. There are various options including:

- Extending your home's central heating system
- Fitting underfloor heating
- Electric wall heaters
- Freestanding appliances

For South facing conservatories freestanding appliances are a good idea as they can be removed from the conservatory during the warmer Summer months, creating extra space.

### Lighting

Lighting is important to create the right ambience in your conservatory. Low voltage spotlights can be fitted into the roof of your conservatory and are available in either a brass or white finish. A selection of lamps and wall lights placed around the conservatory will help to create a cosy feel for enjoying your conservatory in the evenings.

## Ultraframe - leading the conservatory industry through innovation and expertise

Ultraframe have been designing and manufacturing conservatory roofing systems for over 25 years. The roof is perhaps the most important element within your conservatory, as it has to withstand snow and wind loads, window cleaners accessing adjacent windows and, of course, remain weather proof for a very long time. That's why you should insist on Ultraframe, who have over 1 million conservatories in the field giving the ultimate in peace of mind. Ultraframe - tried, tested and trusted.

### The best products

- Ultraframe have a roofing system solution to suit every home and every budget.
- The Ultraframe roof is the most configurable on the market ensuring a conservatory can fit every home
- Offer options for personalisation to ensure your conservatory will be as individual as you are
- It's products are the most thermally efficient on the market so you'll be comfortable in your conservatory all year round
- Ultraframe is the only company that supplies ventilation in every roof as standard. Our patented ventilation systems minimise condensation and ensure that you enjoy your conservatory whatever the weather

### The reassurance of a quality brand

- All Ultraframe roofs are engineered for the extremes of the UK climate and are approved by the British Board of Agrément (BBA) to last "at least 25 years".
- Our extensive research and development team continues to innovate and extend the boundaries of design, so when you choose an Ultraframe roof, you can be certain that you're getting the best
- Our unique software - with its integrated design guide - draws on weather data from the Building Research Establishment to ensure your conservatory is designed for that once in 50 year occurrence of snow loads or wind speeds. Give the retailer your postcode to ensure compliance with the correct structural loads which only Ultraframe can verify through its software

### Ultraframe Certificate of Authenticity

Of course with a reputation such as Ultraframe's, imitation is inevitable, and some disreputable companies have been known to promise to fit an Ultraframe roof, only to fit an inferior system. To help put an end to this serious problem we've introduced the Ultraframe Certificate of Authenticity – your guarantee that you have a top quality Ultraframe roof. In addition, you receive a free maintenance manual when you register your roof.
